

Project Initialization and Planning Phase

Date	15 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand the customer's perspective in predicting and analyzing the Human Development Index (HDI) of countries. This template helps identify the challenges faced while evaluating development indicators such as life expectancy, education, and Gross National Income (GNI) per capita. A well-defined customer problem statement enables the team to develop an effective machine learning solution that provides accurate HDI predictions and meaningful insights. Throughout the process, the team gains a better understanding of users' needs, allowing them to build a system that supports informed decision-making for governments, researchers, policymakers, and educational institutions.

E

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Government Policymaker	Predict the Human Development Index (HDI)	Unable to accurately analyze multiple	HDI depends on life Expectancy, Education,	Confident about making informed development
