

Project Executable Files

Date	2 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

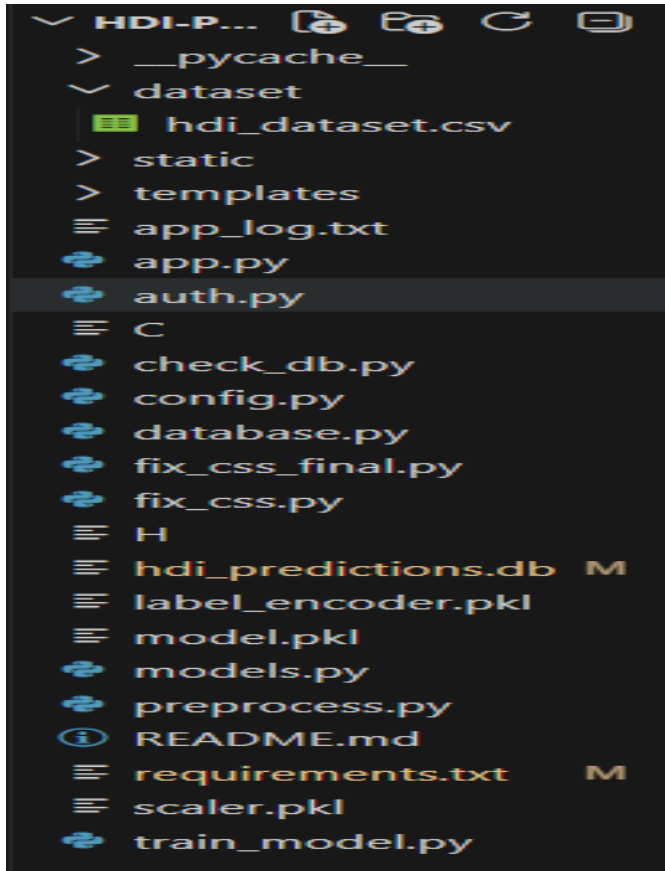

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

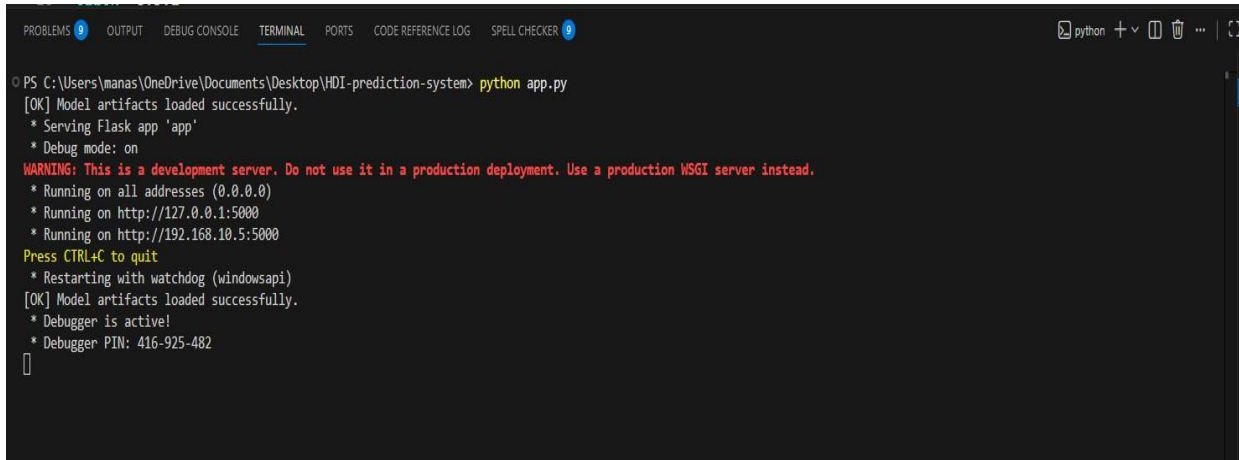

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://human-development-index-system.onrender.com/
Login Credentials (Demo)	No need of Credentials
Platform / Hosting Provider	Render
Repository Link	https://github.com/laharigandi/Human-Development-Index-System
Demo Video Link	https://drive.google.com/file/d/18Bxl5Ceqs08FIPZ8vS_lBTRcKcJFX-Tm/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

```

PROBLEMS 9 OUTPUT DEBUG CONSOLE TERMINAL PORTS CODE REFERENCE LOG SPELL CHECKER 9
python + v [ ] [ ] [ ] [ ]

PS C:\Users\manas\OneDrive\Documents\Desktop\HDI-prediction-system> python app.py
[OK] Model artifacts loaded successfully.
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on all addresses (0.0.0.0)
* Running on http://127.0.0.1:5000
* Running on http://192.168.10.5:5000
Press CTRL+C to quit
* Restarting with watchdog (windowsapi)
[OK] Model artifacts loaded successfully.
* Debugger is active!
* Debugger PIN: 416-925-482
  
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality and completeness of the input data and training dataset.	Use validated HDI datasets and retrain the model periodically with updated data.
2	The system currently predicts HDI using only four indicators (Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per Capita).	Future versions can include additional socio-economic indicators for improved prediction accuracy.
3	The application currently runs on a local Flask server and requires deployment for public access.	Can be deployed on cloud platforms such as Render, Railway, or AWS for production use.
