

Coding & Solution

Date	21 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Flask, Bootstrap, Scikit-learn, Pandas, NumPy
Key Features Implemented	User Authentication (Login & Registration), HDI Score Prediction, HDI Category Classification, Input Validation, Interactive Dashboard, Data Visualization, Prediction History, PDF Report Generation, Responsive UI
Pending / Incomplete Features	Country Comparison, Interactive World Map, Email Notifications (Optional Enhancements)
Setup / Run Instructions	1. Clone the repository. 2. Install dependencies using <code>pip install -r requirements.txt</code> . 3. Run the application using <code>python app.py</code> . 4. Open http://127.0.0.1:5000 in a web browser

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
