

### Project Demo Planning

|                      |                                       |
|----------------------|---------------------------------------|
| <b>Date</b>          | 15 March 2026                         |
| <b>Team ID</b>       | XXXXXX                                |
| <b>Project Name</b>  | A Comprehensive Measure of Well-Being |
| <b>Maximum Marks</b> | 1 Mark                                |

#### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                 | Description                                                                                                     | Duration (mins) | Responsible Member |
|------|------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction                 | Introduce the project, objectives, and problem statement.                                                       | 2               | Team Member 1      |
| 2    | Solution Overview            | Explain the system architecture, technology stack, and machine learning model used.                             | 8               | Team Member 2      |
| 3    | Live Demonstration           | Demonstrate user registration, login, HDI prediction, dashboard, prediction history, and PDF report generation. | 8               | Team Member 3      |
| 4    | Machine Learning Explanation | Explain input parameters, prediction process, and HDI category classification.                                  | 3               | Team Member 4      |
| 5    | Results & Performance        | Present prediction accuracy, testing results, and application performance.                                      | 2               | Team Member 1      |
| 6    | Conclusion & Future Scope    | Summarize the project, discuss future enhancements, and conclude the presentation.                              | 2               | Team Member 3      |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                                        |
|------|----------------------------------|--------------------------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Explain the need for HDI prediction and project objectives.                                                  |
| 2    | Solution Overview                | Present the system architecture, workflow, and technologies used.                                            |
| 3    | Live Feature Demonstration       | Demonstrate login, HDI prediction, dashboard, prediction history, visualizations, and PDF report generation. |
| 4    | Q&A Session                      | Answer questions related to the machine learning model, implementation, testing, and future enhancements.    |
