Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User (Researcher, Policymaker, Student) enters HDI indicator values and receives the prediction.
Rectangle with numbered header	Process	Validate Input, Process Data, Predict HDI using Machine Learning Model.
Rectangle (solid fill, no number)	Data Store	HDI Dataset / Trained Machine Learning Model used to store data and prediction model.
Labeled arrow	Data Flow	Flow of input data, prediction request, and HDI prediction result between the user, processes, and data store.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
